EDUCATION

Bachelor of Technology

Kalinga Institute of Industrial Technology

06/2018 - Present

Bhubaneswar, India

Electronics and Telecommunication

- CGPA - 8.86/10

ISC

St Thomas' Boys' School

05/2016 - 04/2018

Kolkata, India

Computer Science

- Percentage - 82/100

ISCE

St Thomas' Boys' School

05/2014 - 04/2016

Kolkata, India

Science

- Percentage - 92/100

PERSONAL PROJECTS

AI-Enabled Payment Prediction Web App (11/2020 - 03/2021)

- Built an AI-enabled payment prediction app that would predict the possible payment dates of the Company's customers depending on their previous payment cycles.
- First using different Python Models we predicted the dates of the customer. Followed by that we used to update the data in DB with JDBC connections. Later we developed code for the CRUD operations using JDBC and servlets to send the data to our UI. Finally, we used React to develop our UI and performed our task.

Hand Written Digit Recognition (09/2020 - 12/2020)

- We developed a comparison between the accuracies between different models of pythons at their ability to detect a handwritten digit to recognize. We wrote a paper on it as well.

Todo App (05/2020 - 06/2020)

- A basic to-do app to keep track of the undone works. Used concepts of props, states, and hooks in React Js.

WORK EXPERIENCE

Product Intern

Highradius Technologies

05/2021 - Present

Bhubaneswar, India

HighRadius is a Fintech enterprise Software-as-a-Service (SaaS) company that leverages Artificial Intelligence-based Autonomous Systems to help companies automate Accounts Receivable and Treasury processes.

Achievements/Tasks

- Being a product intern we develop the needs of new clients for their respective products. Full-stack development with JAVA frameworks and reactJs.
